

New Edge Technology Perfects Your Dream Kitchen

HYBRID FILTRATION SYSTEM

95%
filtration rate

The new edge combination of flat plate and baffle filter design for faster extraction and better filtration.

H²MELTZ TECHNOLOGY

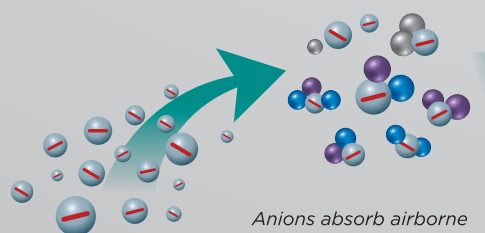

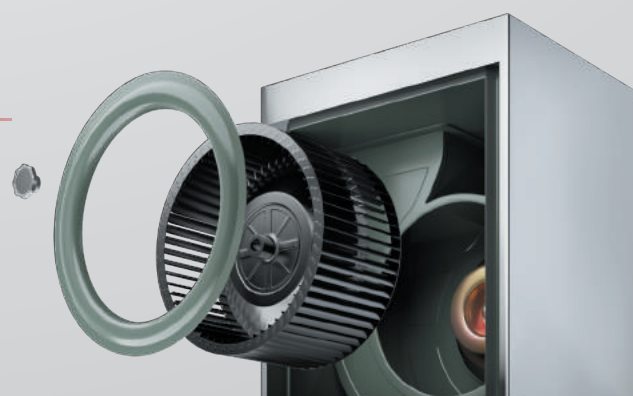

Cut down
50%
of cleaning time

High heat 80°C is activated for 10 minutes to melt stubborn grease on the fan and its cover.

EASY MAINTENANCE

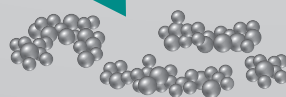

Cleaning work
in
1-2-3
steps

Easily reach to the motor fan without the need to remove the entire cooker hood from the wall. Cut down cleaning process and save cost.

Negative Ion Cluster
Oxygen in the air is charged and oxygen anion is generated.

Anions absorb airborne pollutants such as dust, pollen, smoke and PM2.5.

Charge neutralisation occurs, making the air pollutants subside naturally to the ground

ION-BALANCER

**CLEAN
AIR**

Produces anions to balance or neutralise static charges from pollutants. Eliminates odours and sanitises the air.
